WORK EXPERIENCE

Laravel Back-end Developer Infocar Tecnologia, São Paulo Dec 2022 - present

Junior back-end developer focusing on the usage of the Laravel framework and technologies like the Pest test runner and Octane to boost performance. In addition, compiling PHP modules (such as Swoole) and building Docker images to AWS.

Attractions Cast Member Walt Disney World, Florida Dec 2024 - Feb 2025

Alumni for the Disney College Program. Helping and entertaining guests by doing tasks like crowd control, line management and team work and communication via radio. Some skills include multi-tasking, courtesy, creativity, problem solving, quick thinking and clear communication.

Django Rest Full-stack Developer SQAD, São Paulo Apr 2022 - Dec 2022

First professional experience as software developer and working on real production codes. Main tasks included developing API's that follow RESTful architectural patterns and integrate them into single page applications built with React and using Firebase hosting and Google Cloud.

PROJECTS

Public Projects	Stack	Links
GOpenAPI	Golang, YAML	GitHub
Backend Compentition 2024/Q1	NestJS, Docker, PostgreSQL, NGinx	GitHub
WritterSpot	NestJS, PostgreSQL, Docker	GitHub
Personal Website	NextJS, Framer Motion	Site
Municipal Zoo Website	Bootstrap, ReactJS	Site
GitHub Clone	Express, React, Tailwind, Docker	Site

Freelancing

Student ID Card Issuance System	NestJS, AWS, Docker
Service Scheduling System	Laravel, MongoDB, PostgreSQL, FrankenPHP, Docker

EDUCATION

2022 - present Computer Science at **Universidade Cruzeiro do Sul**

COURSES AND CERTIFICATIONS

Cambridge	First Certificate of English (FCE) [B1 English Level]
Rocketseat	NLW Journey - GoLang
Udemy	Docker for Developers (Docker Swarm and Kubernetes)
Udemy	Learn Web Application Security - OWASP Top 10
Udemy	Micro-services with gRPC [Spring Boot + Protobuf]
Udemy	NestJS - Building real project API from scratch
Udemy	Cloud Computing Essentials
Udemy	SOLID principles: Introduction to Software Design and Architecture
Udemy	Fundamentals of Back-end Engineering
Udemy	The Complete SSL and TLS Guide: HTTP to HTTPS

PUBLICATIONS

Morishita, Gabriel (Sept. 2023). "NestJS: Bun vs NodeJS". In: *Dev To*, p. 1. URL: <https://dev.to/mourishitz/running-nestjs-server-with-bun-4cdl>.

SKILLS

Bilingual	Able to communicate in both Portuguese and English. Throughout my career I put in practice my English skills, in a level where I prefer to learn new things in English. During 3 months I was able to live in a country where I had to speak English with everyone around me, making my English skills sound more natural and smooth.
Clean Coder	I always prioritize readability and performance while coding, following principles presented on well known books and references like "Clean Code" written by Robert C. Martin.
GNU/Linux Knowledge	Productive with UNIX environments and terminal centered tools such as Neovim, TMUX and Git.
Multitasking and Problem Solving	As a programmer, problem solving, multitasking and logical thinking must be sharp skills. During my career and experiences like working on Disney Operations I was able to put in practice all those skills while performing them under pressure and a lot of different circumstances.

KNOW ME BETTER

Hobbies	I study as a hobby, which means I am always in search of new things to learn. Those include recent studies on music theory playing the guitar, calculus and physics studies using university library as a source of knowledge, as well as studying new languages like Japanese (which is the one I am currently learning by myself). I also game once in a while.
Career Goals	I aim on improving my skills and eventually becoming a staff software engineer or similar. I can however visualize myself in a leading position but I feel my profile matches more with the technical and specialization side of programming. I also wanted to become a college teacher after achieving my academic goals (which include bachelor and master degrees)
